DETAILED ACTION

This Office Action is responsive to the applicant's amendment filed on March 20, 2006.

Claims 2-4 have been amended. Claims 21-23 have been canceled. Accordingly, claims 1-20 are pending in this application.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 and 18-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1, 2, 6 and 18, the limitation " θ " renders the claims indefinite, because it is unclear what the θ is to be claimed by applicant. The θ is the angle formed by a space_within two-lines from a common point. The applicant should clarify/define which lines formed the θ .

Claims 3-5, 7, 19 and 20 are rejected by virtue of their dependence on claims 1, 2, 6 and 18.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-16 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Krayer (Patent Number 5,152,592).

Regarding claims 12-16 and 21, as shown in Fig. 10, Krayer discloses a turntable in the shape of a Reuleaux triangle (159) and having a gerotor (100) attached thereto, a substantially planar bearing surface being on the underside of the turntable/gerotor (100); gerotor having three substantially identical lobes (106); the turntable being made from countertop material. Note that in claim 12, the limitation "for manual turning" is an intended use. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963).

Allowable Subject Matter

Claims 1-7 and 18-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 8-11 are allowed.

Claim 17 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed on March 20, 2006 have been fully considered but they are not persuasive.

Art Unit: 3748

- In response to applicant's argument that the angle θ is well know. However, the

applicant fails to define the θ in the basic hypocycloid formula in claims 1-7 and 18-20. It is

noted that the features upon which applicant relies (i.e., θ is the angle between the x-axis and the

line connecting the centers of two circles) are not recited in the rejected claim(s). Although the

claims are interpreted in light of the specification, limitations from the specification are not read

into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

- With regard to applicant's argument that Krayer '592 does not show a substantially

planar bearing surface (see Remarks section, page 2). The examiner respectfully disagrees.

Krayer clearly teaches that at least one the turntable (159) and the gerotor (100) having a

substantially planar bearing surface (not numbered; however, read by the examiner as the

substantially planar bearing surface is the surface between the shelf (159) and the cam surface

(104)) (see col. 7, line 41- col. 8, line 1-8) [emphasis added].

- In response to applicant's argument that the references fail to show certain features of

applicant's invention, it is noted that the features upon which applicant relies (i.e., a bearing or

means of support) are not recited in the rejected claim(s). Although the claims are interpreted in

light of the specification, limitations from the specification are not read into the claims. See In

re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time

policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Application/Control Number: 10/791,596

Art Unit: 3748

date of this final action.

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theresa Trieu whose telephone number is 571-272-4868. The examiner can normally be reached on Monday-Friday 8:30am- 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas E. Denion can be reached on 571-272-4859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
